

Test Analyst

The job specification

Due to expansion, an exciting opportunity has arisen for a Test Analyst to join an established and rapidly expanding software house based in UK, working remotely in Nairobi.

eShare provide a hosted Enterprise wide board assurance solution which links and monitors all aspects of governance. The suite includes meeting management, central information storage, risk management and decision making.

Reporting to the Head of Product Management, you will be responsible for the testing of new developments, upgrades to existing solutions, reporting and tracking defects until resolution and investigating automated testing opportunities. The role will give you exposure to several of the latest technologies including SharePoint, Office 365, Android, iOS and Windows Applications.

We are looking for someone with a passion for technology, great communication skills and strong “hand-on” capability, who is willing and able to share knowledge and encourage best practice within our growing IT team.

The Candidate

Essential

-  Web application testing experience
-  Creating test plans
-  Confidence & ability to report defects precisely
-  Experience creating test scripts
-  Regression testing experience
-  Automated testing experience

If you are...

-  Enthusiastic
-  Willing to learn
-  A team player
-  A good communicator
-  A logical thinker
-  A problem solver

...then we would like to hear from you!
