

Manual Software Tester

About the company

eShare provide an Enterprise wide board assurance solution which links and monitors all aspects of governance. The suite includes meeting management, central information storage, procedure management, risk management and decision-making.

Your role within the company

Due to expansion within the Demand team, we are now looking to recruit a Test Analyst to assist with the manual testing of our web-based BoardPacks product across a full browser range. Based in our head office in Newbury, you will liaising with teams across the business to bring any product issues through from discovery to resolution.

Reporting To: Head of Product Management

Responsible For: No direct reports.

Hours of Work: 09:00 – 17:30pm (with limited flex)

Duties and Key Responsibilities

Manual Testing

- The discovery and reporting of any bugs, or other issues within our web-based products.
- Creating and maintaining manual test scrips.
- Creating and reviewing test plans.
- The ability to create your own test data and utilise it appropriately within your day-to-day duties.

Process-driven

- The successful candidate will have previous experience of utilising and following test plans, with an understanding of how a test plan fits into the greater process.
- This is a cross-functional role and involves working closely with the Product Manager, Development team and the Project Manager.
- We are looking for someone that is able to challenge process and ensure that the team are working in the most effective way.
